MATERIALS

Coco Furniture by CV. Sony Sentral Industri presents handcrafted furniture pieces embedded with meticulously arranged coconut shell inlays, celebrating both sustainability and refined artistry. Each shell fragment is carefully cleaned, cut, polished, and layered onto a solid wood base—primarily premium teak and selected hardwoods—creating rich organic textures with a subtle natural sheen. The coconut shell surface is sealed with high-grade protective coatings using advanced finishing techniques, ensuring durability, moisture resistance, and long-lasting beauty. This process enhances the shell's inherent tonal variations—ranging from deep espresso browns to warm caramel highlights—allowing each piece to reflect a distinctive, one-of-a-kind character.

Complementing the shell detailing, the furniture is available in a curated selection of modern finishes and upholstery options. From smooth matte lacquers and solid contemporary tones to richly textured fabrics in versatile colors and patterns, each element is chosen to harmonize with the natural mosaic effect of the coconut shell. For a more refined aesthetic, top grain leather options add depth and prestige, aging gracefully over time. The result is a collection that balances sustainable materials, premium craftsmanship, and modern elegance—designed to elevate any decorative space with warmth and individuality.
